RE: AI Diversion Q and MCCA rules Q

*Unrelated portions redacted*

The term Community Spouse does include individuals that receive Medicaid in the community. They can both be on Medicaid, and the spouse in the community can in fact receive and AI diversion from the spouse in the facility. Just keep in mind that the diverted income will be countable for the spouse in the community, and the community spouse would need to be within the income guild lines for Medicaid.

Thank you,
